

Welcome to Earth Class!

Parents and students please allow me to introduce myself via this welcome letter. My name is Ms. Rhyne and I am excited to work with you and your child this semester as they develop into their leading role as future scientists! I figured you would like to know a little about me! This will be my 3rd year teaching earth science and my 1st complete full year teaching at Quality Education Academy. I graduated from Carver High School. I am an alumnus of Winston Salem State University "GO RAMS ". I currently attend Salem college to obtain a master's degree in Education. I am the oldest of 6 children and have 3 beautiful nieces and 1 handsome nephew whom I love dearly. Teaching is my passion and my calling to change the lives of everyone I teach. I believe "education is the most powerful weapon we can use to change the world today -Nelson Mandela". As the teacher, I am here to facilitate the process of learning earth science and create future leaders of the world! As young responsible scholars, there will be many things expected of you as well as of you as their parents!

I hope this course will be most successful and most rewarding for you. This course is designed to provide information in reference to how the world works. Scholars will participate in activities intended to enhance awareness of what the world needs to continue to function as intended while fostering a willingness to take care of our world.

Scholars will learn in-depth the following concepts: physical geology, plate tectonics, environmental geology, meteorology, climate, ecology and astronomy. This course will be hands-on, self-motivated learning and technology driven. "Let's have a captivating school year"

A few of my favorites!!!

Favorite Color: Purple
